

**NCDF-CRYO Cryopreserved Cynomolgus fibroblasts**

**Cell Specification**

Lot 063A-150804

Batch release: March 2, 2016

<p>Skin: Face Gender: female Age: 6 years 3 months</p>	<p>Serology: negative for a Herpes virus, Herpes B virus, STLV-1, SIV, SRV 1-5, Ebola</p>
<p>Cryopreservation: Passage 1 on: August 4, 2015 Number of cells per vial: <math>1.0 \times 10^6</math> cells</p>	<p>Thawing: January 11, 2016 Viability after thawing: 96 % Yield after thawing: <math>1.46 \times 10^6</math> cells Culture in FGM Fibroblast Growth Medium Number of Population Doublings: &gt; 20  Mycoplasma: negative</p>
<p>Phase contrast in passage 2 after thawing (40x)</p> 	<p>Phase contrast in passage 2 after thawing (100x)</p> 

Note: Yield, viability and population doublings are based on experiments performed at PRIMACYT using PRIMACYT's manual for thawing and culture of human/ Cynomolgus fibroblasts.
