

**NCDF-CRYO Cryopreserved Cynomolgus fibroblasts**

**Cell Specification**

Lot 067-3-190812

Batch release: October 2, 2019

<p>Skin: Face Gender: male Age: 6 years 1 month</p>	<p>Serology: Negative for a Herpes virus, Herpes B virus, STLV-1, SIV, SRV 1-5, Ebola</p>
<p>Cryopreservation: Passage 1 on: August 12, 2019 Number of cells per vial: <math>1.5 \times 10^6</math> cells</p>	<p>Thawing: n=1 August 16, 2019 Viability after thawing: 100 % Yield after thawing: <math>1.32 \times 10^6</math> cells Culture in FGM (Fibroblast Growth Medium) Number of Population Doublings: &gt; 20  Mycoplasma: negative</p>
<p>Phase contrast in passage 1 after thawing (100x)</p> 	<p>Phase contrast in passage 3 after thawing (40x)</p> 
<p>Note: Yield, viability and population doublings are based on experiments performed at PRIMACYT using PRIMACYT's manual for thawing and culture of human/ Cynomolgus fibroblasts.  This product should be considered as potential biohazard. Only intended for <i>in vitro</i> use.</p>	
<p>Issued by: Claudia Garve</p>	<p>Checked by: Anett Ullrich</p>
