

**NHDF-AD-CRYO Cryopreserved human fibroblasts**

**Cell Specification**

Lot 045-130206:

Batch release: June 4, 2014

<p>Skin: Foreskin Gender: male</p>	<p>Serology: n.a.</p>
<p>Cryopreservation: Passage 1 on: February 6, 2013 Number of cells per vial: <math>1.0 \times 10^6</math> cells</p>	<p>Thawing: May 21, 2013 Viability after thawing: 95 % Yield after thawing: <math>1.03 \times 10^6</math> cells Culture in FGM Fibroblast Growth Medium Number of Population Doublings: &gt; 20  Mycoplasma: negative</p>
<p>Phase contrast in passage 2 after thawing</p> 	<p>Fluorescence imaging in passage 2 after thawing: Fibroblast specific surface antigen CD90 (green); nuclei (Hoechst 33342, blue)</p> 

Note: Yield, viability and population doublings are based on experiments performed at PRIMACYT using PRIMACYT's manual for thawing and culture of human fibroblasts.
